INDEX TO VOLUME 93

INDEX TO SUBJECTS

PAGE

Z Andromedae, The Evolution of a Peculiar Stellar Spectrum: *P. Swings and O. Struve* . 356

RT Aurigae. *Arthur L. Bennett* 52

ζ Aurigae, On the Atmospheric Structure of. *F. E. Roach* 1

B Stars, Interstellar Line Intensities and the Distances of the. *John W. Evans* . . . 275

B-Type Stars, Studies of Faint. *Carl K. Seyfert and Daniel M. Popper* 461

c Stars, The Luminosities of the Nonvariable. *Ralph E. Wilson* 212

29 Canis Majoris, The Light-Curve of the Eclipsing Variable. *Carl K. Seyfert* . . . 442

29 Canis Majoris, The Spectroscopic Binary. *Otto Struve and Frances Sherman* . . . 84

γ Cassiopeiae, The Recent Shell Spectrum of. *Ralph B. Baldwin* 333

γ Cassiopeiae, Temperature Variations of. *W. Albert Hiltner* 505

Coudé Spectrograph of the Mount Wilson Observatory, Some Results with the. *Walter S. Adams* 11

Cyanogen Criterion of Stellar Luminosity, The Extension to the Supergiants of the. *Philip C. Keenan* 475

Diffuse Radiation in the Galaxy. *L. G. Henyey and J. L. Greenstein* 70

Erratum. *Z. Kopal* 368

Erratum. *O. Struve, C. T. Elvey, and W. Linke* 512

Errors in the Spectroscopic Absolute Magnitudes of Dwarf Stars of Types F, Late K, and M, Systematic and Accidental. *Gustaf Strömberg* 33

Fowle, Frederick Eugene. *C. G. Abbot* 209

Heavy Water (*HDO*) Band ν_2 at 7.12 μ, The Grating Infrared Solar Spectrum. I. Rotational Structure of the. *Arthur Adel* 506

Hydrogen, The Continuous Spectrum of Stellar Atmospheres Consisting Only of Atoms and Negative Ions of. *Rupert Wildt* 47

Interstellar Absorption near the North Pole of Rotation. *Philip C. Keenan and Horace W. Babcock* 64

Interstellar Absorption to Reddening, The Ratio of. *J. L. Greenstein and L. G. Henyey* . 327

Interstellar Line Intensities and the Distances of the B Stars. *John W. Evans* . . . 275

PAGE

Interstellar Medium. I. Local Equilibrium, The Dynamics of the. *Lyman Spitzer, Jr.* . 369

17 Leporis (BS 2148), A Note on the Spectrum of. *Otto Struve* 504

β Lyrae and other Close Binaries, On the Interpretation of. *Gerard P. Kuiper* . . . 133

β Lyrae, Some Line Intensities in. *Jocelyn R. Gill* 118

β Lyrae, On the Nature of the System of. *Zdenek Kopal* 92

β Lyrae, The Spectrum of. *Otto Struve* 104

β Lyrae in the Visual Region, The Spectrum of. *J. L. Greenstein and T. L. Page* . . 128

Milky Way in Cygnus and Scorpius, Photographs of the. *Harold A. Lower* 506

Nebulae. XI. Physical Processes in Gaseous. *G. H. Shortley, L. H. Aller, J. G. Baker, and D. H. Menzel* 178

Nebulae. XII. Physical Processes in Gaseous. *Donald H. Menzel and Lawrence H. Aller* 195

Nebulae. XIII. Physical Processes in Gaseous. *Donald H. Menzel, Lawrence H. Aller, and Malcolm H. Hebb* 230

Nebulae. XIV. Physical Processes in Gaseous. *Lawrence H. Aller* 236

Nebulae. XV. Physical Processes in Gaseous. *Leo Goldberg* 244

Nebulae, Reynolds' Numbers for Extragalactic. *F. Zwicky* 411

NH Molecule in Spectra of Class R, The Resonance Bands of the. *Rupert Wildt* . . . 502

Night Sky, The Spectrum of the. *C. T. Elvey, P. Swings, and Walter Linke* 337

Nitrous Oxide (*NNO*) Band ν_1 at 7.37 μ, The Grating Infrared Solar Spectrum. II. Rotational Structure of the. *Arthur Adel* 509

Novae, The Distances and Luminosities of Three. *Dean B. McLaughlin* 417

Photometry, The Reciprocity Principle in Lunar. *M. Minnaert* 403

Planetary Atmospheres and Water-Cell Temperatures. *Arthur Adel and C. O. Lampland* 391

Planets, On the Theory of the Origin of the. *R. A. Lyttleton* 267

Pleione, The Spectrum of the Shell of. *Otto Struve and P. Swings* 446

Pleione, The Visual Spectrum of. *Jesse L. Greenstein* 453

Radiation Pressure in the Convective Stellar Model. *Louis R. Henrich* 483

Reviews:

Baker, Robert H. *An Introduction to Astronomy* 368

Stratton, F. J. M., and W. H. Manning. *Atlas of Spectra of Nova Herculis 1934* (W. W. Morgan) 368

Tolman, Richard C. *The Principles of Statistical Mechanics* (T. E. Sterne) 513

Solar Hydrogen Vortices, The Nature of. *R. S. Richardson* 24

PAGE

Spectra of B 1985 and WY Geminorum, The Emission Lines in the. *P. Swings and O. Struve* 455

Spectra of Class R, The Resonance Bands of the NH Molecules in. *Rupert Wildt* 502

Spectra of Gases in the Extreme Ultraviolet, Absorption. *Toshio Takamine and Yoshio Tanaka* 386

Spectra of Long-Period Variables, Displacements of Lines in the. *P. W. Merrill* 380

Spectra of Me Variables, Ultraviolet Emission Lines in the. *Paul W. Merrill* 40

Spectra of Two Peculiar Stars: MWC 17 and CD -27° 11944, The. *P. Swings and O. Struve* 349

Spectral Classifications of Faint Stars, Intercomparison of Various. *Alexander N. Vyssotsky* 425

Spectrohelioscope for the Observation of Spectra of Chromospheric Erruptions, Use of the Hale. *W. Dodson* 208

Spectroscopic Absolute Magnitudes of Dwarf Stars of Types F, Late K, and M, Systematic and Accidental Errors in the. *Gustaf Strömberg* 33

Spectroscopic Binaries, On the Determination of Mass Ratios of. *O. C. Wilson* 29

Spectroscopic Binary 29 Canis Majoris, The. *Otto Struve and Frances Sherman* 84

Spectrum. I. Rotational Structure of the Heavy Water (*HDO*) Band ν_2 at 7.12 μ, The Grating Infrared Solar. *Arthur Adel* 506

Spectrum. II. Rotational Structure of the Nitrous Oxide (*NNO*) Band ν_1 at 7.37 μ, The Grating Infrared Solar. *Arthur Adel* 509

Spectrum: Z Andromedae, The Evolution of a Peculiar Stellar. *P. Swings and O. Struve* 356

Spectrum of γ Cassiopeiae, The Recent Shell. *Ralph B. Baldwin.* 333

Spectrum of 17 Leporis (BS 2148), A Note on the. *Otto Struve* 504

Spectrum of β Lyrae, The. *Otto Struve* 104

Spectrum of β Lyrae in the Visual Region, The. *J. L. Greenstein and T. L. Page* . . . 128

Spectrum of the Night Sky, The. *C. T. Elvey, P. Swings, and Walter Linke* 337

Spectrum of Pleione, The Visual. *Jesse L. Greenstein* 453

Spectrum of the Shell of Pleione, The. *Otto Struve and P. Swings* 446

Spectrum of Stellar Atmospheres Consisting only of Atoms and Negative Ions of Hydrogen, The Continuous. *Rupert Wildt* 47

Spectrum of ζ Tauri, The 1914 Shell. *Ralph B. Baldwin* 420

Star-streaming, A Simple Demonstration of. *Ralph E. Williamson* 511

Stellar Motions in Terms of a Nonsteady-State Model for the Galaxy, An Interpretation of. *John Titus* 57

PAGE

Stellar Systems. I. The Time of Relaxation of. *S. Chandrasekhar* 285

Stellar Systems. II. The Time of Relaxation of. *Ralph E. Williamson and S. Chandrasekhar* 305

Stellar Systems. III. The Time of Relaxation of. *S. Chandrasekhar* 323

Stream-Motions of 92,656 Stars, The. *W. J. Luyten* 250

ζ Tauri, The 1914 Shell Spectrum of. *Ralph B. Baldwin* 420

Temperature Radiation from Venus, The Importance of Certain Carbon Dioxide Bands in the. *Arthur Adel* 397

Temperatures, Planetary Atmospheres and Water-Cell. *Arthur Adel and C. O. Lampland* 391

Variable, 29 Canis Majoris, The Light-Curve of the Eclipsing. *Carl K. Seyfert* . . . 442

Variables, Note on Eclipsing. *Newton L. Pierce* 506

Venus. Comments on Dr. Adel's Paper, On the Observable Radiation from the Carbon Dioxide in the Atmosphere of. *C. O. Lampland* 401

Venus, The Importance of Certain Carbon Dioxide Bands in the Temperature Radiation from. *Arthur Adel* 397

Wolf-Rayet Eclipsing Binary: HV 11111 = BD+38°4010 = HD 193576, The Absolute Dimensions of a. *Sergei Gaposchkin* 202

INDEX OF AUTHORS
